Cliff –

Regarding the Roulette response to your comments, the Water Division is still working on them and hopes to finish them in the next couple weeks.

Thank you for the information about Catalyst and what you would like to hear from PADEP on May 21.

We also got the Nation's request to open consultation on Sandstone UIC permit and will initiate the scheduling of that soon.

Hi Brian,

We had our meeting today and we were able to speak about some of the topics you had sent last week.

With regards to the Catalyst permit we are currently working on the comments and do not need any further information at this time. A couple members of our group would like to do the tour of the Seneca Resources facility as well, and will be reaching out to them. Thanks for forwarding the information.

We also wanted to inquire on the comments to the Roulette permit that were submitted, and if there is a time frame when we might expect them?

We look forward to the meeting with PADEP on the 21st. and the conversations that we'll have. We want to express the Nations concern for water quality, and would like to discuss what the water quality is like at the head waters of the Allegany.

We would also like to learn more about their permitting process, and how many people rely on the Allegany for their drinking water.

Please let me know if you have any other questions, thanks and talk to you soon.

Hi Brian,

I have been well, I hope all is good with you too.

The water group actually has a meeting on the 11th on Catalyst and the 21st meeting with PADEP and I am going to address the items below beforehand with them.

Regarding the Catalyst permit, we have been preparing comments and I do not believe we have any questions at this time. This will be address on the 11th meeting

Thank you for looking into the invitation to the Seneca Resources facility and providing that information, I will also address this at the next meeting to see what members would be interested in attending.

I will also reach out to the group and see if there any specific topics or areas of interest that we would like to cover at the PADEP meeting.

If I can get back to you on the 11th with this information would that be ok? That way I can make sure we are all on the same page. When we meet has been the best way to cover these topics, let me know if you would need it beforehand and I can reach out to some of the members.

Thanks,

Clifford C. Redeye III

Hi Cliff,

I hope you have been doing well. Just wanted to check in on a few items.

- ? Regarding the Catalyst permit, I believe after our consultation meeting we held on April 21 the Nation was preparing comments to be submitted to EPA. Did you need any more information from EPA prior to that submission? Please let us know what we can do to assist.

?

?

Nonresponsive based on revised scope

Thanks for any feedback on the above items, take care!
